FROM THE DIRECTOR

When is information not enough? Information must become knowledge before it is useful. The vast majority of people in the U.S. think that they are informed about Christianity, but how many of them really know Christ? This is just a short encouragement to go beyond seeking information and regurgitating it in your papers and other assignments. In order to know, you have to deeply interact with the information you collect. To be sure, you have to be informed about Christ before you can know him. But there are many atheists who are “informed” about Him. Many of them know the scriptures better than many who claim to know Christ. But they have not fully wrestled with that information in the light of eternity. The papers and assignments you write in any subject can have eternal significance if you wrestle with the truth to know it, because knowing the truth is what sets you free.
